

## **Allergy test and treatment with NAET (Nambudripad Allergy Elimination Technique)**

[www.naet.com](http://www.naet.com), [www.naet-europe.com](http://www.naet-europe.com)

NAET® was discovered by Dr. Devi S. Nambudripad in 1983. It is a non-invasive, drug free, natural solution to alleviate allergies of all types and intensities using a blend of selective energy balancing, testing and treatment procedures from acupuncture/acupressure, allopathy, chiropractic, nutritional, and kinesiological disciplines of medicine.

One allergen is treated at a time. If you are not severely immune deficient, you may need just one treatment to desensitize one allergen. A person with mild to moderate amount of allergies may take about 15-20 office visits to desensitize 15-20 food and environmental allergens.

Basic essential nutrients are treated during the first few visits. Chemicals, environmental allergens, vaccinations, immunizations, etc. are treated after completing about ten basic essential nutrients. NAET can successfully alleviate adverse reactions to egg, milk, peanuts, penicillin, aspirin, mushrooms, shellfish, latex, grass, ragweed, flowers, perfume, animal dander, animal epithelial, make-up, chemicals, cigarette smoke, pathogens, heat, cold, other environmental agents. It may take several office visits to desensitize a severe allergen.

### **NAET can be effective to treat the following symptoms:**

**Head, eyes, nose and ear:** for example hay fever, pollen/grass allergies, allergic reactions to cosmetics, eye drops or other medications and for headaches triggered by food.

**Tonsils, salivary glands, larynx:** if an allergy is the cause of these symptoms, then it can be successfully treated with NAET.

**Teeth and jaw diseases:** allergens as fillings, crowns or implants can be desensitized using NAET.

**Functional heart and breathing problems:** if they are caused by an allergy.

**Abdomen:** for instance gluten intolerance (celiac disease) and other food intolerances can lead to abdominal discomfort and can be treated with NAET.

**Urinary tract:** intolerance to cold, urine or pantyliners can be the cause of a bladder infection.

**Genitals:** an allergy to sperm or soap for example can cause vaginal irritation.

**Diseases of the locomotor system:** can be treated with NAET in case they are caused by an allergy. Pain in particular, can be caused due to an allergy. For example a foot or leg pain can be due to intolerance to leather, shoe's glue and/or textiles.

**Skin diseases:** even babies and small children can be successfully treated for atopic eczema through a surrogate (mum or dad). Infants with skin rashes caused by a milk intolerance can be successfully treated with NAET, as well.

**Autonomic nervous system:** conditions such as flushes, sleep disorders and poor concentration can be treated with NAET.
