

Neural therapy

Neural Therapy was originally developed in Germany by the Huneke brothers. It involves the injection of Procaine or Lidocaine, common local anaesthetics, into various but very specific areas. Neural Therapy is based on the theory that trauma can produce long-standing disturbances in the electrochemical function of tissues.

Injection can be applied for all types of tissues affected by trauma, such as scars, nerves or a cluster of nerves called ganglions. A correctly administered Neural Therapy injection can often instantly and lastingly resolve chronic long standing illness and chronic pain.

Some indications for Neural Therapy:

Head: migraine headaches, neck headaches, trigeminal neuralgia, whiplash and neck pain.

Eyes: inflammatory eye diseases, eyelid disturbances.

Nose: Inflammatory or allergic disorders of the nose or sinuses.

Ear: inflammatory diseases of the ear, tinnitus.

Diseases of the tonsils, the salivary glands, the larynx: Hoarseness, recurring sore throat, voice dysfunctions.

Tooth and jaw diseases

Functional heart and respiratory disorders: cardiac arrhythmia, palpitations, persistent dry cough, difficulties taking deep breaths.

Abdomen: gastrointestinal disorders of various causes, gastritis, liver and gallbladder problems, digestive problems.

Urinary tract: inflammation or irritation.

Genitals: functional disorders or inflammatory diseases.

Diseases of the musculoskeletal system: pain and restricted movement in the spine, severe lower back pain, sciatica and disc hernias. Joint pain, pain in the shoulder, elbow, hip, knee joint, etc. Soothing effect for osteoarthritis and inflammatory joint diseases. Disruptions after amputations.

Autonomic functional disorders: circulatory disorders, thermoregulatory disorders, sleep disorders, help with menopausal symptoms, help with irritability and depressive mood and thyroid dysfunction.

Wound healing disorders: painful scars which block the flow of energy

To prepare yourself for the therapy we recommend the concise booklet written by Peter Dosch: Wissenswertes zur Neuraltherapie [interesting information about neural therapy], ISBN: 3-8304-0805-6

The English edition is: Facts about Neural Therapy According to Huneke: (Regulating Therapy) Brief Summary for Patients. (Available at the doctor's office).

The book explains what you should report to your doctor about your medical history and what is important to remember after neural therapy treatment.
